About Me

Results-driven PHP/Laravel Developer with 3+ years of experience in designing, developing, and maintaining scalable web applications. Proficient in Laravel, Core PHP, MySQL, RESTful APIs, and MVC architecture, with hands-on experience in enterprise logistics, freight management, and government projects. Skilled in building secure, high-performance backend systems, optimizing databases, integrating third-party APIs, and delivering production-ready solutions. Passionate about writing clean, maintainable code and continuously learning modern technologies to build efficient and reliable applications.

Education

Chandigarh University

Master of Computer Applications (MCA) – Pursuing

2026 – Present

Mohali, Punjab

Maulana Mazharul Haque Arabic And Persian University

Bachelor of Computer Applications (BCA) — 75.13%

2022 – 2025

Patna, Bihar

T.P.S, Chapra

Class XII — 56%

2020 – 2021

Chapra, Bihar

Gagan Dev Narayan Singh H.S., Saran

Class X — 56%

2018 – 2019

Saran, Bihar

Technical Skills

Languages: Core PHP, Laravel 10, CodeIgniter 4, SQL

Web Technologies: HTML5, CSS3, Bootstrap 5, JavaScript, jQuery, React.js (Basic)

Database: MySQL

Tools & Others: GitHub, VS Code, Postman, Figma, Cron Jobs

Experience Summary

Laravel Development

2 Years

CodeIgniter

1.5 Years

Core PHP

1+ Year

MySQL

2+ Years

REST API Development

2 Years

Projects

TAP-RISE (Solo Full-Stack Laravel Developer) [Visit Site](#)

- **Company:** Indev Consultancy Pvt. Ltd.
- **Overview:** National-level platform for the SEED Division, Department of Science and Technology (DST), Government of India. Built entirely as a solo Laravel 10 developer, enabling organizations, consultants, innovators, and buyers to collaborate on rural innovation initiatives.
- **Tech Stack:** Laravel 10, PHP 8+, MySQL, Blade, Bootstrap 5, REST APIs, Eloquent ORM, Laravel Notifications, WebSockets.

QCC – Workforce Certification & Verification System (Lead Developer) [Visit Site](#)

- **Company:** Indev Consultancy Pvt. Ltd.
- **Overview:** Government-grade workforce certification system. Developed QR Skill Card module, payload hashing, blockchain verification, and public certificate verification portal.
- **Role:** Lead Developer (Handled Independently).

- **Tech Stack:** Core PHP, MySQL, REST APIs, Webhooks, QR Code Generation, ADI Blockchain API, JWT, mTLS, Cron Jobs.

Rashtriya Kishor Swasthya Karyakram (RKSK) [Visit Site](#)

- **Company:** Indev Consultancy Pvt. Ltd.
- **Overview:** Government of India health platform monitoring adolescent wellness across nutrition, mental health, and reproductive health.
- **Work:** Developed CodeIgniter 4 backend modules and REST API integrations between schools, health centers, and district portals.
- **Tech Stack:** CodeIgniter 4, PHP 8+, MySQL, REST APIs, Bootstrap, jQuery.

Bansidhar Ila Panda Foundation (BIPF) [Visit Site](#)

- **Company:** Indev Consultancy Pvt. Ltd.
- **Overview:** BIPF is part of the IMFA Group, a well-established organization in the state of Odisha. The project focuses on managing and monitoring CSR (Corporate Social Responsibility) activities and data collected from field operations.
- **Work:** I worked on this project for nearly 6 months, contributing to the design, development, and maintenance of the application. I was actively involved in developing and managing 4–5 core modules, ensuring smooth data flow from field teams, proper data handling, and overall system reliability.
- **Tech Stack:** CodeIgniter 4, PHP 8+, MySQL, REST APIs, Bootstrap, jQuery.

EXIM – Freight Forwarding & Logistics Management System [Visit Site](#)

- **Company:** Max Transtech Limited
- **Role:** Software Engineer (PHP / Laravel)
- **Overview:** Enterprise logistics platform for managing Air Freight, Ocean Freight, Vendor Management, Customer Management, Shipment Processing, Pricing, Invoicing, KYC Verification, and Financial Reporting.
- **Responsibilities:** Developed scalable backend modules, REST APIs, Invoice Management, Vendor Rate Upload, Excel Import/Export, RBAC, KYC Workflow, PDF Generation, and optimized MySQL queries using Laravel 12.
- **Tech Stack:** Laravel 12, PHP 8, MySQL, Blade, Bootstrap 5, JavaScript, jQuery, AJAX, REST API, Git.

Experience

Max Transtech Limited

February 2026 – Present

Software Engineer (PHP / Laravel)

- Working on **EXIM – Freight Forwarding & Logistics Management System**, an enterprise logistics platform for managing Air Freight, Ocean Freight, Customers, Vendors, Shipments, Pricing, and Financial Operations.
- Developing scalable backend modules using **Laravel 12**, PHP, MySQL, and RESTful APIs.
- Developed and maintained modules including Vendor Management, Customer Management, Air Booking, Ocean Booking, Invoice Management, Profit & Loss Reports, Vendor Rate Upload, Vendor Serviceability, Vendor Zone Rates, and KYC Workflow.
- Implemented Excel Import/Export, PDF generation, Role-Based Access Control (RBAC), Workflow Approval System, Credit/Debit Notes, and secure file management.
- Optimized MySQL queries, fixed production issues, and improved application performance for high-volume logistics operations.
- Project URL: <https://exim.maxtranstech.com/>

Indev Consultancy Pvt. Ltd.

May 2023 – February 2026

Software Developer (PHP / Laravel)

- Developed and maintained enterprise web applications using **Laravel**, **CodeIgniter 4**, Core PHP, and MySQL following MVC architecture.
- Worked on multiple Government and Enterprise projects including **TAP-RISE**, **QCC – Workforce Certification & Verification System**, **RKSK**, and **Bansidhar & Ila Panda Foundation (BIPF)**.
- Designed and developed scalable backend modules, Admin Panels, RESTful APIs, authentication systems, and role-based access control (RBAC).
- Integrated third-party APIs, payment gateways, blockchain verification APIs, QR Code generation, email notifications, and webhook services.
- Designed and optimized MySQL databases, complex SQL queries, joins, stored procedures, indexing, and performance tuning for large datasets.
- Implemented Excel Import/Export, PDF generation, file upload management, reporting dashboards, and automated Cron Jobs.
- Collaborated with UI/UX designers, QA engineers, and cross-functional teams to deliver secure, scalable, and production-ready applications.
- Resolved production issues, optimized application performance, fixed security vulnerabilities, and participated in deployment and maintenance activities.
- Followed coding standards, Git-based version control, code reviews, debugging, testing, and Agile development practices throughout the software development lifecycle.
